 vodstva (USPR) 1959, 4-4, no. 4, p. 51.

DESCRIPTION: Mining engineering, Coal mines.
 Fans, Drifts, Cleaning.

For hydraulic cleaning of a fan drift a special pipe is
 led off the surface fan-dragging main and carried along
 the entire length of the drift, valves being fitted at 10
 metre intervals. A line hose connected to each nut is
 equipped with pumps, the number of which depends on
 the length of the fan drift and the volume of settled
 dust. When the fan is not in operation (roughly once
 every fortnight) a jet of water at a pressure of 10-16
 (Engineering, T.T. v. 8, no. 8) (over)
